

ABSTRACT OF THE INVENTION

2 Units (10), systems (100), and methods with treated water are provided in which a treated
3 water source (12, 104) is included integrally in a host piece of equipment (10, 102). The host
4 piece of equipment (10, 102) includes host functions such as ice making (14, 106). Other
5 equipment, such as dispenser (108) may be coupled to the equipment (102) to share the
6 treated water from treated water source (104).
